ANCILLARY EXTRAS

The installer is responsible for ensuring that where Ultraroof is supported by means such as masonry or timber/ PVCu frame walls, the structure provides enough lateral support and resistance to wind uplift. Further guidance can be obtained through Ultraroof's technical documentation/guides. Wendland is not responsible for the structural adequacy of any existing building work used as part of an overall project. Whilst assistance is provided ultimate responsibility for securing Building Regulations lies with the retail installer.

For further guidance please contact the Technical Support Team on 01200 452918 or email techsupport@wendland.uk.com

Order Form

Tick this box if you would like to order hup! walls with your roof

hup! Wall Specification:

1. Footprint

Please draw the footprint of your building marking each elevation A, B, C, D etc. You should use the base datum which lines up with the external of the Ultrapanel clips - wall finishes and battens will overhang the base. See specification guide for more details.

Extended Base Tray required?

Width of Cavity wall 300mm. See page 34 of Specification Guide for more details

Please note hup! walls will protrude at least 45mm (25mm for battens, plus c15mm depending on claddings) outside of your base so that the wall finishes (claddings) will be ventilated. All critical dimensions will be confirmed before order stage.

Please return to quotes@ultraframe.co.uk

Order Form

2. Elevations

Please draw each elevation of your hup! walls marking the elevations clearly with A, B, C, D etc. Include window and doors sizes and distance from the eaves as well as the floor clearly.

Tick this box if you require the cable management panel which is supplied on all panels above 560mm.
